Cotton Genetics
Study of Gene Action involved in Yield and Fiber
Quality Traits in Upland Cotton

LAP Lambert Academic Publishing Aug 2013, 2013. Taschenbuch. Book Condition: Neu. 220x150x6 mm. Neuware - Upland Cotton (*Gossypium hirsutum* L.) is a major cash crop in the world. Cotton improvement can be accomplished by favorable combination of genes in cotton varieties through hybridization. This book covers study of inheritance of different yield contributing and fiber quality traits in upland cotton. Additive-dominance model was applied to understand gene action involved in the traits studied. This work explores the genetic behavior of...
